

Julian's Key Guide

What is Julian's Key?

Julian's Key is a free Queensland Health Health Passport that helps healthcare staff quickly understand important information about a patient.

What can it include?

Medical conditions, medications, allergies, communication preferences, emergency contacts, sensory needs, mobility requirements and information for carers.

Who is it for?

Anyone can use it, but it is especially helpful for people with disabilities, autism, dementia, chronic illness or complex healthcare needs.

Benefits

It improves communication and helps staff quickly understand what matters most to the patient.

Queensland Hospital Watch
Supporting Queensland patients through information, advocacy and shared experiences.
